Profile & Education

Computer Engineering student at the *Instituto Tecnológico de Costa Rica (ITCR)*, graduating in 2026 and actively seeking a **professional internship** to complete the degree. Awarded an *Excellence Scholarship* during most of the academic journey for outstanding performance. Proven ability to design and ship full-stack software development products for real clients, applying agile methodologies and strong adaptability to new tools and technologies.

Languages: Spanish (native) • English (B2 – Upper Intermediate)

Instituto Tecnológico de Costa Rica

Bachelor's in Computer Engineering

2023 – 2026 (in progress)

Liceo Experimental Bilingüe Claudio Bonilla Alarcón

High School Diploma with emphasis in English

2017 – 2022

Experience

Assistant Developer

Instituto Tecnológico de Costa Rica

June 2025 – Present

San Carlos, Costa Rica

- Led the redesign of the *Revista Matemática Educación e Internet* website using Next.js and React, adding responsive design and SEO optimization for proper indexing by Google Scholar.
- Designed and developed a VS Code extension for automated unit test generation in Unity, enabling multi-model AI integration (OpenAI, Ollama for local models) via API-based configuration.
- Collaborated with SciELO coordinators to implement a standardized XML-based markup workflow, ensuring compliance with international academic indexing standards.
- Developed and optimized automated workflows for data validation, publication, and process standardization across multiple journal volumes.

Full-Stack Developer

Independent Client Projects

February 2024 – Present

Freelance, Costa Rica

- Built *Nature Tours La Fortuna* (naturetourslafortuna.com ) , a full-stack booking platform with PayPal REST API integration, real-time horse availability management, and a custom admin dashboard — deployed and generating revenue from launch.
- Developed a corporate website (gruposen.site ) and an internal proforma generation tool for *Grupo SEN*, replacing a fully manual quotation workflow with a PDF-export web system.
- Built responsive digital menus and WhatsApp-integrated reservation/order systems for restaurant clients: *La Ranza* (laranza.com ) and *Laras Food* (larasfood.pages.dev ) .
- Currently developing *ToDoPB* for the *Municipalidad de San Isidro de Peñas Blancas*, a commercial and tourism directory app with an interactive business map powered by Supabase.

Projects

Nature Tours La Fortuna

Feb 2026 – Present

Full-stack booking platform with PayPal REST API integration, real-time horse availability management, and admin dashboard — **40+ reservations in the first month** via organic traffic.

React · Node.js · PostgreSQL · Neon · PayPal API · JavaScript naturetourslafortuna.com • [GitHub](#)

Digital Mathematics Journal

Aug 2025 – Present

Migrated the *Revista Matemática Educación e Internet* from a plain-JS site to Next.js with academic SEO best practices, achieving full Google Scholar indexing and restoring international visibility.

Next.js · React · Tailwind CSS · JavaScript tecdigital.tec.ac.cr • [GitHub](#)

VS Code Extension: AI Unit Test Generator for Unity

Jul 2025 – Present

VS Code extension that automates Unity C# unit test generation with support for multiple AI providers (OpenAI and Ollama for local models) via a simple API key switch.

TypeScript · VS Code API · OpenAI · Ollama · Unity · C# [GitHub](#)

Grupo SEN — Corporate Website

Feb 2026 – Present

Designed and launched a professional corporate site showcasing the company's full service catalog and past work, providing a credible digital identity and multiple contact channels.

React · Tailwind CSS · JavaScript gruposen.site • [GitHub](#)

La Rancha — Restaurant Website

Mar 2026 – Present

Mobile-friendly responsive site with a photo-rich digital menu and WhatsApp-integrated table reservation flow, expanding the restaurant's reach beyond walk-in customers.

React · Tailwind CSS · JavaScript larancha.com

Additional freelance projects (restaurant order systems, municipal apps, internal tools) available at [Portfolio](#) and [GitHub](#).

Tech Skills

Frontend & UI: React, Next.js, Vue.js, Tailwind CSS, HTML, CSS, JavaScript, TypeScript, Vite, Responsive Web Design, LaTeX

Backend: Node.js, Python, Java.

Databases: PostgreSQL, Neon, MySQL, Supabase

Tools & APIs: Git, GitHub, REST APIs, PayPal API, VS Code API, Jira, Cloudflare Pages

Methodologies: Agile, Scrum, Clean Architecture, Feature-Based Architecture, Software Development Life Cycle (SDLC)

Soft Skills

Core: Problem Solving, Critical Thinking, Fast Learning, Continuous Learning, Time Management

Collaboration: Proactivity, Effective Communication, Teamwork, Empathy
